

# ENERGI(E)SCH

Newspaper of the shop stewards of the IG Metall list "Wir für EnERgy" – Siemens Energy Erlangen

## Energetic demand

THE TOP CANDIDATES OF THE LIST "WIR FÜR ENERGY (= WE FOR ENERGY) – IG METALL"

### REPLY

Dirk, you are list leader and have been on leave from work for many years. What makes it different the list We for EnERgy – IG Metall from the other lists?

Our works council list is made up of experienced, dynamic and committed employees. We reflect the complete spectrum of existing fields of activity and areas of work and what distinguishes us is **how** we work. We have high standards, rely on diplomacy and trusting cooperation. Nevertheless, we all know - sometimes it is necessary to endure a conflict and lead it with tact. This is what distinguishes our team. The aim of our work in the works council committee is to consistently represent the interests of the employees, to strengthen **and further expand co-determination in the company**. Employee interests must flow in all directions, even far beyond the campus or Siemens Energy. As IG Metall List, we have a decisive advantage here. We are in close contact and are in the network of the most experienced trade union for our industry – so we can work at all levels. The industrial and socio-political positions of IG Metall are part of our program. And conversely, our experience and requirements from the company flow into the collective bargaining agreement. Reasonable proposals, the necessary follow-up.

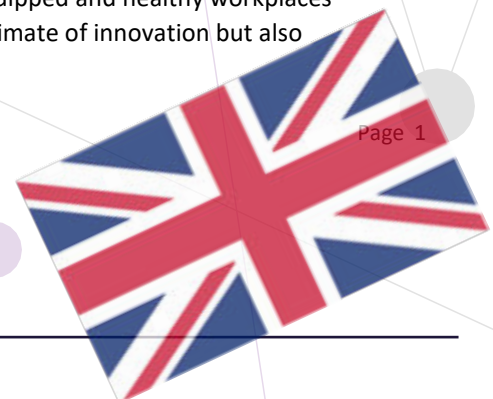

To exert pressure and enforce it vigorously for this, nationwide cooperating networks are indispensable to be able to proceed

### What does this mean in concrete terms for our company?

More dialogue between the works councils and the employees helps to tackle problems more effectively. Overtime, unlimited working hours, difficult working conditions and many other important issues could be better regulated through more consistent co-determination.

Our company needs a plan to make full use of its capabilities and development potential, including company-specific personnel planning. We must keep and build future technologies in the company. The climate of innovation must be able to develop, and the framework conditions for our employees must be created for this. Finally, this includes sufficient, ergonomic, well-equipped and healthy workplaces that promote the climate of innovation but also new opportunities.

Only an innovative company can survive in the market in the long term and thus offer good, secure jobs, and we are committed to this.

Erlangen must remain the center, and the people with experience must not be scattered through more small towns in the surrounding area.

For example, education and research as well as sustainable management are also important. Werner von Siemens once said: " I don't sell the future for immediate profit. "

### What does your current work look like?

At the Erlangen plant, many of our candidates are currently active in the works council committees, some in leading positions. As works councils, we work constructively with all functionaries for the benefit of the employees, always respectfully and in accordance with our guidelines. Nevertheless, we are consistent and persistent whenever necessary. **To be able to achieve even more for the employees in the future, we need greater weight through a very good election result in 2026.**

### Dirk, what do you see as the main areas of responsibility?

First, there is the fairness of pay. Good work must be rewarded – regardless of whether you do it at home or travel the world. And as already mentioned, overtime, unlimited working hours, difficult working conditions and psychological stress are our main focuses. We want to develop and enforce ways and means for the lowest possible burdens and fair compensation. We are thinking of time sovereignty, part-time models, mobile working or long-term accounts for planning individual working lives. Cooperation and trust instead of control and monitoring – this is the basis for a good, sustainable working atmosphere. It is worthwhile improving the climate in order to increase the satisfaction of employees and managers.

### Sonja, with you, another very experienced works council member is in 2nd place on the list. You are also the deputy head of the body of trust. Why is the close relationship with IG Metall so important?

The points Dirk just mentioned are only a snapshot and no one can predict what will happen in the next months or years. Currently, in terms of business, figuratively speaking, the sky is sunny and blue.

But we are in difficult times and can lend weight to our interests.

### What are your fields of activity?

As a member of the Education and Training Committee, our trainees are particularly close to my heart. Whenever possible, I try to stop by our Erlangen training center and support the apprentices.

In the personnel committee, I work with Dirk on the processes of temporary workers and make sure that they are treated fairly.

I am also currently involved in the "New Canteen" project group. The decisive factor is that we can be satisfied with the result in the end and say: I like to eat here.

### Andreas, you only replaced Peter Geis in the works council office last year and took over his duties as IT committee spokesman. How do you approach the tasks?

My goal is to support the development of the IT landscape continue to accompany constructively but critically.

This means that IT, and AI in particular, should not be directed against the employee, i.e. it should not monitor, unnecessarily constrict or overload anyone. Rather, IT should support good work in a meaningful way, in compliance with data protection and personal rights. Old tools were often replaced by new ones that were not yet mature. This creates unnecessary frustration. But even apart from IT tools, we are increasingly seeing tendencies to shift all risks and administrative costs onto the employee. It is important to take countermeasures in good time.

### You are also the IGM contact person for working students. What does that mean?

For many, working student work is their first contact with the world of work. A large proportion also have an international background. Of course, many questions arise, especially about working hours and pay. Only IG Metall members receive some benefits under the collective agreement. I advise our working students on how they can use these advantages. The IG Metall team and I can often help with many other questions and provide guidance.

# “Wir für EnERgy” und IG Metall - Rundum wirksam

Organisiert. Vernetzt. Überall.  
Engagement entfaltet Wirkung.

## Betriebsrat

Erstellung neuer, ausgewogener und fairer Kollektivregelungen.  
Überwachung der Einhaltung aller Regelungen z.B. Arbeitsbedingungen, Arbeitszeiten, Sicherheit, Innovation, Bildung, Gesundheitsschutz und Gleichbehandlung

## Ausschüsse

Detaillierte und fundierte Einflussnahme auf einzelne Entscheidungen in Gremien wie z.B. Entgeltausschuss, Personalausschuss und DV-Ausschuss.

## Aufsichtsrat

Mitbestimmung auf oberster Ebene u.A. durch Jürgen Kerner und Dr. Andrea Fehrmann - Vertretung mit hoher Fachkompetenz und großem Netzwerk - ohne Abhängigkeit vom örtlichen Arbeitgeber.

## Tarifvertragspartei

Arbeitsbedingungen konsequent und zukunftsfähig weiterentwickeln.  
Konkret: Entgelterhöhung, T-Zug, Kündigungsschutz, Vereinbarkeit von Familie und Beruf.

## Industriepolitik

Deine wirksame Vertretung bei den großen Themen: Koalitionsvertrag, Netzwerke, Branchenkonferenzen und andere Lobbytermine  
Konkret: Kraftwerkstrategie, Industriestrompreis, Local-Content Ansatz, Beschäftigungspotentiale im Energieanlagenbau, Schutz europäischer Arbeitsplätze.

## Rechtsschutz

Abgesichert sein.  
Vollumfängliche Beratung und Rechtsvertretung, falls doch mal etwas anders läuft als geplant.

## IG METALL

### In a word...

**Strong representation needs clarity and responsibility**

German employers are largely free to choose and determine their own structures, and they organize themselves in committees and networks. In the interests of a healthy balance, the works council was established in German many decades ago by the "Works Constitution Act ". With the upcoming works council election at Siemens Energy, employees are faced with an important decision. They elect their works council to improve their working conditions, to have a say in changes and to shape the future.

Different lists are running – with different attitudes, working methods and effects. For the employees, this is not about names or slogans, but rather about the question of who can represent their interests effectively, responsibly and sustainably.

I will not go into detail about the other lists, but I invite all employees to mentally compile some of the characteristics of a good works council. For these characteristics, one should check the competing lists and their (unrecognizable) contents. Is profile recognizable? How much substance do the contents of the lists have – how independent of the employer can they work with them? How close to the employer should a works council work? Some may be deliberately reserved and others deliberately close to the employer. However, especially in economically and structurally challenging times, there is a need for a strong and independent representation of interests that clearly and confidently brings to the perspective of employees and does not rely exclusively and consistently on acceptance and adaptation. The list "Wir für EnERgy – IG Metall" stands for the following attitude: It combines constructive cooperation with clear representation of interests. Respect, reliability and eye level characterize the daily work. At the same time, there is the ability to be capable of conflict.

Conflict is not an “end in itself”, but a means to achieve fair solutions and create long-term security. We experience some works councils of other lists as strongly conflict-oriented – there is often a focus on escalation and legal disputes. Legal action may be necessary in individual cases but should be well considered. Constant legal conflicts put a strain on the working atmosphere, tie up resources and rarely lead to stable solutions in the interests of the employees. A central advantage for the work of the Works Council lies in the comprehensive networking and organization of IG Metall. No other list can fall back to a comparable structure. Collective bargaining policy, industrial policy, co-determination and lobbying are intertwined. Decisions at the company level are often closely linked to political, economic and collective bargaining conditions. Being able to actively shape these connections strengthens the position of employees in the long term.

In this context, the collective bargaining strength of IG Metall is particularly relevant. The collective bargaining agreements in the metal and electrical industries form the basis for pay, working hours, additional benefits, job security – and thus directly for your work for Siemens Energy. Collective bargaining policy does not have an abstract effect, but a concrete one in the everyday life of employees. A strong trade union presence in the works council increases the assertiveness of these standards in the company. In addition, IG Metall is also represented at the highest company level. Employee representatives on the Supervisory Board bring the perspective of the employees into strategic decisions. This cooperation strengthens transparency, responsibility and long-term stability.

The interests of the employees are effectively represented not only in the company, but also at this company level.

The stronger the "Wir für EnERgy – IG Metall" list is represented in the works council, the greater the influence in central committees and decision-making processes. This is where the course is set for working conditions, personnel development, health protection and future strategies. More strength means more creative power – in the interests of the employees.

Thanks to the unionization, there is also direct access to specialist knowledge, training and the exchange of experience across company boundaries. Tried-and-tested solutions, best-practice examples and strategic support flow directly into the company's work. This creates professionalism, reliability and continuity. Another important component is trade union legal protection. Labor law develops primarily through case law. The possibility of enforcing rights consistently and in a well-founded manner strengthens the position of employees not only in individual cases, but structurally. Legal certainty creates room for maneuver and prevents undesirable developments from becoming permanently entrenched.

The works council election is therefore not a mere formality, but a trend-setting decision. It determines whether advocacy is clear, competent, networked and effective, or whether it remains fragmented, conflict-driven or too close to employers' interests. For the employees, a strong IG Metall list means security, professionalism, influence and perspectives. The list "Wir für EnERgy – IG Metall" stands for responsibility, competence and sustainable representation of interests – today and for the future of employees –effective in all directions.

 Steff.Schulze@igmetall.de

## Dirk Schencke

**Exempted works council member | SE BR ERLANGEN**

I now have 27 years of experience in our company, which allows me to recognize and anticipate many developments and is very beneficial to me in finding solutions.

During this time, I deepened my knowledge of process and control technology for power plants of all types. I was able to get involved in all process steps – standard maintenance, quotation processing, project management and service. I had contact with customers and suppliers in various functions of project management. I have IBS experience from the time before I studied electrical engineering, as an electrician.

In addition, for almost 20 years I have been volunteering as an official of IG Metall in a wide variety of functions, e.g. as head of the shop stewardship of our company, in the collective bargaining committee, but also on the local board of our office, as an auditor, in the district of Bavaria and as a consultant.

In the Works Council, my attention is particularly focused on pay issues, which are very closely linked to working time issues, but also on all other collectively agreed and non-collective bargaining terms and conditions of employment and their further development. I maintain close contact with other works council bodies inside and outside Siemens Energy as well as with the central works council. I believe that learning from this and agreeing on the best course of action is the basis of goal-oriented works council work.

**We are ready for EnERgy – pave the way with us.**

## Sonja Duggen

**Exempted works council member | SE BR ERLANGEN**

We employees at Siemens Energy, as well as the entire working population in Germany, are under growing pressure: a shortage of skilled workers, a shortage of digital

and transformation calls for new paths. Jobs are increasingly insecure. The goal remains: fair wages, regulated working hours, strong collective bargaining autonomy – as an expression of social justice and job security.

Co-determination in the company is a cornerstone of democratic work culture, but it needs to be strengthened. Social change – for example due to AI and globalization – makes a strong works council at Siemens Energy indispensable. It protects interests, helps shape change and gives employees a voice.

For me, taking the human factor into account has always been the central element in my 35-year-old

my work in the company and my work on the works council. Take advantage of the opportunity to help shape our company and give us your vote.

**Taking responsibility together with „Wir für EnERgy – IG Metall“**

## Andreas Gerner

**Exempted works council member | SE BR ERLANGEN**

I have completed my 25th anniversary of service and should be known to many colleagues, especially in the areas of HVDC, FACTS and GIS. Since 2010, I have been involved in the trade union and works council, with increasing intensity and responsibility. I am currently an exempt works council member and active for you as spokesman of the IT committee, member of the working time committee and working student IGM contact person.

What drives me is the desire for you to feel seen, heard and understood - to effectively represent your interests regardless of position, age or origin. I am a candidate

because our works council needs fresh ideas, courageous decisions and courageous action. I'm ready with competence, heart and mind.

**Wir für EnERgy + IG Metall = A strong team**

## Sven Schank

**Project Engineer | SE PE EN ES EBS**

Especially in today's challenging times, cohesion is important, which is why it is important to get involved in a strong trade union like IG Metall right now. In my almost 14 years of corporate affiliation I

have already experienced many ups and downs.

Starting with an extensive ramp-up to an AIP program with a reduction of over 1,500 employees. In today's world, we must deal with the challenge of overload and overtime. These hurdles can only be overcome with a strong works council team, which has the IG Metall trade union behind it as a powerful partner. Gifts "Us", the list "Wir für EnERgy – IG Metall", your company representatives and contact persons of IG Metall, your trust.

**Individuals can make a difference, with many, however, we can move more.**

## Markus Rascher

**HVDC Customer Service Manager | SE GT SV GLS ON WH**

As a member of the works council, I am committed to a fair, healthy and social working environment in which everyone is listened to and respected. It is important to me

that work and well-being remain in balance – through safer working conditions, good and timely communication and competent support. Whether it's about labor law, health or social concerns: I listen, get involved and look for solutions together with you. For a strong togetherness, in an environment in which we all feel comfortable and enjoy working.

**Get in touch at any time – I'm here for you!**

**Christian Mueller-Eickhoff**

**Project Engineer | IT'S TIME IN PRE WS1**

I've been part of this company for over 20 years – and I know what our daily work is worth. With this experience, I am committed to strong co-determination, solidarity with each other and fair participation of all employees in joint success. Our performance deserves recognition; our voices must be heard. I want decisions to be made in the interests of the workforce – transparently, fairly and future-oriented. Together, we can make a difference: for secure jobs, respectful interaction and genuine appreciation.

Therefore, I would be very happy if you support me in my candidacy and place your trust in me.

**We are only strong together – in the company and for each other.**

**Marion Mirol**

**Marketing Professional | SE DC GT XR**

I have been working at Siemens Energy for many years and have been actively involved in digital and innovative solutions. In the process, I learned that technology is only successful if it supports people – not vice versa.

With my experience in sales, marketing and IT, I know the many opportunities and challenges of digitization in a large company. For me, digital competence means not only technical knowledge, but also the ability to listen, understand the needs of employees and translate them into solutions.

As a member of the Works Council, I want to ensure that we work together to create a digital working environment that remains fair, transparent and humane. My goal: innovations that make our work easier and strengthen us as people.

**For a digital transformation with a focus on people!**

**Stefan Siedler**

**Project Director| SE TI EAD MF&P MA ERL OM**

My name is Stefan Siedler, I am 42 years old, married and have 2 children. I started working at Siemens in 1998 with my apprenticeship. Even during my training, I was involved in the fuel cell and was employed there until 2005. From 2003 to 2009 I attended technical school and the Nuremberg University of Applied Sciences. After a year in the craft business, I started working again at Siemens in fuel cells in 2011. Since 2023, I have been working in Life Cycle Management as a project manager. In 2022, I was elected as the 4th deputy in the severely disabled representatives. I enjoy working at SBV and it's great to see what you can achieve for employees and employees. But you can also see how important this task is - just to mention the tests of the toilet alarms. This shows that the employee representatives, and thus the SBV and the works council, are really making a difference here and pointing out mistakes. Therefore, I would like to play an active role in the works council.

I would be very happy if you would contact me at my candidacy and place your trust in me.

**Lukasz Robak**

**Risk & Opportunity Manager | SE GS C GCO BM TDM**

I have been a proud member of the Siemens/Siemens Energy family for 18 years now. I had the opportunity to get to know both sides of the coin. Be Before joining Siemens, I worked in a company that had neither union representation nor a collective bargaining agreement. This experience has shown me how important it is to have a strong partner like IG Metall at our side.

While we all welcome new and ever better collective bargaining agreements, we should not forget that this is only possible because there are colleagues who support IG Metall and are actively involved. I haven't forgotten it either, or I want to get actively involved so that all of us who work at Siemens Energy will still enjoy coming to work tomorrow. I am convinced that our commitment and support for IG Metall will help us to create an even better working environment. Let's work together to ensure that our voices are heard and that we stand together as a strong team. Entrust us with your voice.

**Together we remain strong for the future**

## Markus Beckmann

**IT Provider Manager | SE DC DTO PPM**

For me, co-determination and social responsibility are core values at Siemens Energy. The Erlangen site is the heart of our company and deserves a strong voice that is committed to safe jobs, fair conditions and sustainable development. Decisions must be made transparently, and the interests of employees must be consistently represented. Together, we can ensure that Erlangen is strengthened as a location for innovation – economically, socially and sustainably.

**Wir für EnERgy – IG Metall for actively designing the future**

## Claus Franke

**Project Leader | SE GT GS CP SPM PM2**

Anyone who, like me, has been working in project work for a long time is currently experiencing increasing work intensification and cases of overload. Strategic personnel planning, especially for the Erlangen site, would therefore be enormously important.

Siemens as well as Siemens Energy areWork historically interwoven with the city of Erlangen. It is therefore important to strengthen and expand our location through further investments. Therefore, I would be happy if you could join the list

**"Wir für EnERgy – IG Metall" please give us your vote.**

## Nikos Papadopoulos

**Service Engineer | SE TI EAD GCO ENC ES**

Whether it's pay, working hours or vacation days. Collective agreements are a great achievement. But being right and being right are two different things. To be able to make full use of one's collective bargaining rights, a strong works council that monitors compliance with the collective agreement, even in times of desks and mobile working.

**To do this, I am running for the works council on the IG Metall list.**

## Steffen Menzel

**Project Director| SE GS C GCO PM-ROW EA**

With over twenty years of service, I have now been representing your interests as a regular works council member since the beginning of 2024, including in the Field Service and Employment Conditions Committee. I am also happy to take on future tasks that we can take on in the context of energy transition, mobile

and on campus. I am also involved in industry conferences. I am looking forward to actively shaping and securing the jobs of tomorrow – regardless of whether you spend your hours at home or are out and about in the world.

## Susanne Rehm

**Project Team Assistance| SE PE PM CP 1 1**

This is me: I am 60 years old, 3 adult children, translator, interpreter and business economist, works council member and member of the "Social Affairs and Health" committee. As the global political situation and issues just as Industry 4.0 or AI work will have a strong impact on our working environment, it is our common task to react appropriately to these influences as a strong works council. I am happy to advocate for the interests of our Siemens Energy employees here at the Erlangen site, especially those with foreign roots.

Based on my own experience, the compatibility of work and family is particularly close to my heart.

## Dirk Stief

**Project Engineer | SE DPS EASO ESD**

After 20 years with the company – both globally in the field and in the office – I have learned that the value in the company is primarily due to the employees.

They should also be remunerated accordingly. Not only in terms of wages and salaries, but also through good working conditions, employment security and fairness in dealing with each other. These values must be maintained and expanded even further!

**That's why I'm running for the list "Wir für EnERgy – IG Metall".**

## Hasan Dogan

**Data Scientist | SE FIN GT BC DPS**

Hi all, I am Hasan. I am working in the field of data and cyber security. Besides work I do enjoy supporting creating a better and diverse workplace where we can boost our productivity using the power of diversity! We should be sure that our company is doing great but at the same time our employees, too. As Team „Wir für EnERgy – IG Metall“, we are one of the good examples of this correlation but what about going even one step further? We can do this together!

## Curiosities

### ELECTRICAL CHARGING

No energy at Energy? We are doing good business through the energy requirements of electromobility. However, there has been enough time for the promotion of electromobility through free charging in our multi-storey car parks months no longer.

### EMERGENCY CALL

Entering the campus offices is only permitted with a mobile phone! If you don't have a business cell phone, can you stay at home? The only thing that would be better would be to ask us employees, "Please don't have an emergency here!", which at least improves the statistics.
